Global use of GPHF-Minilabs for the detection of falsified and substandard medicines

The GPHF-Minilab™
A mini-laboratory developed by the Global Pharma Health Fund (GPHF) to boost the medicines testing capacity at healthcare providers in developing countries. Focus on priority essential medicines, for example antiinfectives. Non-sophisticated, affordable and fit for use in the field. Supplied more than 800 times to 97 countries already. Minilabs save lives. For more, go to www.gphf.org.
